

SPIRAL WOUND GASKETS

GASKET SELECTION

What Style of Gasket Should I Select?

Style CG - Utilizes an external ring which accurately centers gasket on flange face, provides additional radial strength to prevent gasket blow-out and acts as a compression stop. A general purpose gasket suitable for use with flat face and raised face flanges up to and inclusive of class 2500.

Style CGI - A Style CG gasket fitted with internal ring which gives an additional compression limiting stop and provides heat and corrosion barrier protecting gasket windings and preventing flange erosion. Suitable for use with flat face and raised face flanges.

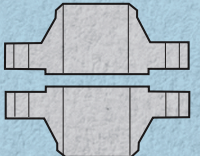

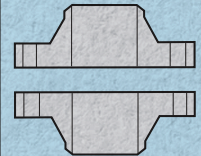

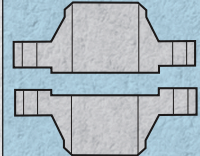

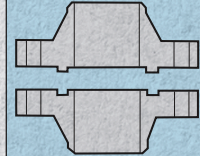

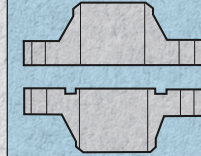

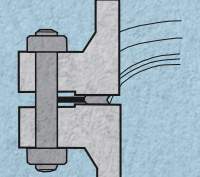

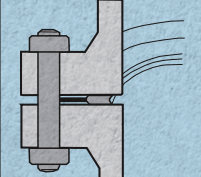

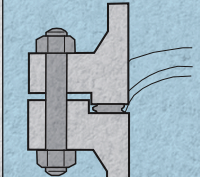

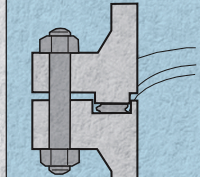

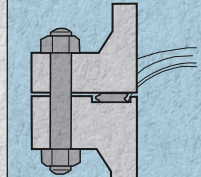

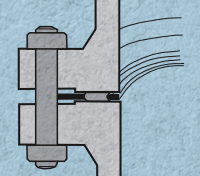

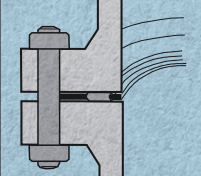

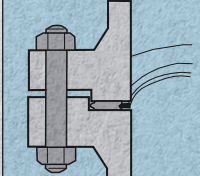

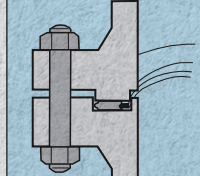

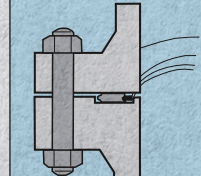

Style R - Basic construction type. Inner and outer diameters are reinforced with several plies of metal without filler to give greater stability and better compression and sealing characteristics. Suitable for tongue and groove or male and female flange assemblies.

Style RIR - Solid inner metal ring acts as a compression stop and fills the annular space between flange bore and the inside diameter of the gasket. Designed to prevent accumulation of solids, reduce turbulent flow of process fluids and minimize erosion at flange faces. Suitable for male and female pipe flanges.

SELECTION GUIDE

Published as an indication of which spiral wound gasket best suits different pipe flange configurations and service conditions.

FLANGE FACE	 Raised Face	 Flat Face	 Male and Female	 Tongue and Groove	 Flat Face to Recess
RECOMMENDED GASKET STYLE For general duties	 Style CG	 Style CG	 Style R*	 Style R*	 Style R*
RECOMMENDED GASKET STYLE For high pressure/-temperature duty, also for gaskets with PTFE filler, corrosive or fluctuating pressure or temperature service conditions.	 Style CGI**	 Style CGI**	 Style RIR**	 Style RIR**	 Style RIR**

* It is essential that Style R gaskets are fitted with a compression stop. Without a correctly dimensioned stop the gasket can easily be over-compressed resulting in failure. To provide a compression stop the depth of the tongue, groove or recess should be controlled to provide optimum compressed gasket thickness with metal to metal contact on the flange faces.

STYLE CG & CGI GASKETS

STYLE CG & CGI GASKETS To Suit Standard Raised Face And Flat Face Flanges

All CG and CGI Gaskets for these standard flanges are 0.175 in (4.5mm) thick, fitted with 0.125 in (3.2mm) thick solid metal rings, unless otherwise stated.

SPECIAL GASKETS

Gaskets of special design can be engineered and fabricated using the same basic fundamentals of Spiral Wound Gasket design and construction to cover a wide range of applications in installations for which there are no industry-wide standards. Special gaskets have been designed for valves, pumps, compressors, turbines, boilers, heat exchangers, etc. Consult with your Ragco location as early in the design stage as possible.

GOVERNMENT SPECIFICATIONS

Spiral Wound Gaskets are available in accordance with Military Specification MIL-G-24716.

Style CG and CGI Spiral Wound gaskets can be manufactured in accordance with all relevant gasket standards to suit the following flange designations.

Please note that gaskets for non-standard flanges are also readily available.

ASME B16.5
 BS 1560
 BS 10
 ASME B16.47 SERIES B (API 605)
 ASME B16.47 SERIES A (MSS SP 44)
 BS 4504
 DIN FLANGES
 JIS FLANGES

WHEN ORDERING PLEASE SPECIFY

- GASKET STYLE (Example: Flexitallic Style "CGI" Spiral Wound Gasket)
- NOMINAL PIPE SIZE (NPS) (Example: 4 inches)
- PRESSURE RATING (Example: Class 900)
- GASKET STANDARD (Example: ASME B16.20)
- WINDING MATERIALS (Example: 316SS)
- OUTER RING MATERIAL (Example: Carbon Steel)
- INNER RING MATERIAL (Example: 316SS)

* RAGCO supports the autonomy of its locations to select the best products to service their markets. Subtle variations of these specification may exist. Contact your RAGCO affiliate for confirmation.

*For Style CGI - see Table 3 for Inner Ring dimensions.

Gasket sizes 1/4" to 3" Class 300, 400 & 600 as well as sizes 1/2" to 2-1/2" Class 900 & 1500 are identical within their respective nominal pipe sizes, therefore inventories need not be duplicated.

In accordance with ASME B16.20, Inner Rings are mandatory for the following flange designations (see Table 3).

- Class 900 - NPS 24 to 48
- Class 1500 - NPS 12 to NPS 24
- Class 2500 - NPS 4 to NPS 12
- All PTFE filled gaskets
- All flexible graphite gaskets unless otherwise requested by the customer

ASME B16.20 does not include dimensions for NPS 1/4, 3/2, or 4 1/2, or Class 400 Flanges up to NPS 3 and Class 900 Flanges up to NPS 2 1/2.

*For Style CGI - see Table 3 for Inner Ring dimensions.

Gasket sizes 1/4" to 3" Class 300, 400 & 600 as well as sizes 1/2" to 2-1/2" Class 900 & 1500 are identical within their respective nominal pipe sizes, therefore inventories need not be duplicated.

In accordance with ASME B16.20, Inner Rings are mandatory for the following flange designations (see Table 3).

- Class 900 - NPS 24 to 48
- Class 1500 - NPS 12 to NPS 24
- Class 2500 - NPS 4 to NPS 12
- All PTFE filled gaskets
- All flexible graphite gaskets unless otherwise requested by the customer

ASME B16.20 does not include dimensions for NPS 1/4, 3 1/2, or 4 1/2, or Class 400 Flanges up to NPS 3 and Class 900 Flanges up to NPS 2 1/2.

* RAGCO supports the autonomy of its locations to select the best products to service their markets. Subtle variations of these specification may exist. Contact your RAGCO affiliate for confirmation.

In accordance with ASME B16.20, Inner Rings are mandatory for the following flange designations (see Table 3).

- Class 900 - NPS 24 to 48
- Class 1500 - NPS 12 to NPS 24
- Class 2500 - NPS 4 to NPS 12
- All PTFE filled gaskets
- All flexible graphite gaskets unless otherwise requested by the customer

ASME B16.20 does not include dimensions for NPS ¼, 3 ½, or 4 ½, or Class 400 Flanges up to NPS 3 and Class 900 Flanges up to NPS 2 ½.

STYLE CG & CGI

To Suit ASME B16.5 & BS 1560 Small Diameter Screwed or Slip-On Flanges

NOTE: The above style CG & CGI spiral wound gaskets are dimensioned to suit existing screwed or slip-on flanges for NPS 1/4 to 1-1/2 ASME B16.5 & BS 1560 flanges.

SPIRAL WOUND MANWAY & HANDHOLE GASKETS

Gaskets for boiler handhole, tubecap and manhole covers incorporating the unique Flexitallic Spiral Wound profile and specially manufactured with graphite filler, are ideal for corrosive, high pressure or temperature duties. Flexitallic's anticipation of developments in modern steam generating and engineering equipment and ability to design to specific requirements are the guarantee of the perfect seal at minimum maintenance cost with consistently high standards of performance.

- High safety factor related to specific operating conditions
- Resilient under concentrated and fluctuating loads
- Compression loadings proportional to safe stresses of cover assemblies
- Prolonged trouble-free service
- Reduced seat cleaning time

Elliptical Handhole Gasket

Diamond Shaped Handhole Gasket

Elliptical Manway Gasket

STYLE M & MC & MCS

Spiral Wound Gaskets for Boiler Manhole Cover Assemblies

The manhole gasket spiral constructions incorporate modified compression values to provide seating loads within the normal range of cover assemblies.

SIZE/RANGE SPECIFICATION: Available in circular, obround, and oval shapes to suit standard manhole plate configurations.

STYLE T

Spiral Wound Gaskets for Boiler Handhole and Tubecap Assemblies

The design features of the basic spiral wound construction alleviate the need for sealing compound. Particularly suitable where old and pitted faces have rendered other gaskets ineffective.

SIZE/RANGE SPECIFICATION: Available in several standard shapes - Supplied in thicknesses of 3.2mm (0.125in.) or 4.5mm (0.175 in.). The standard thickness of 4.5mm (0.175in.) is recommended for use in assemblies where the seat is relatively broad and bolting load is low.

MATERIALS

Standard materials are Type 304 Stainless Steel and graphite windings. Special materials to suit specific operating conditions are available.

TO ORDER

Submit the following with all inquiries: 1) Name of boiler or equipment manufacturer; 2) Gasket style; 3) Dimensions of gasket; 4) Gasket thickness; 5) Flange width of gasket; 6) Pressure service rating; 7) Gasket material preference

STYLE MCS SPIRAL WOUND GASKETS

In keeping with our tradition of taking a leadership role in the gasket industry we are pleased to introduce the style MCS spiral wound gasket for use on boiler manhole cover assemblies. The style MCS gasket is an exclusive design, consisting of a spiral wound gasket with an integral solid metal inner ring. The spiral wound sealing element provides resilience, strength, blowout resistance and superior sealability. The solid metal ring prevents over-compression of the gasket, which is especially important on high pressure boilers. In addition, the rings provide stability and facilitate proper positioning of the gasket on the cover which prevents pinching, shouldering, and other gasket damage resulting from misalignment, irregular plate contours and fillets.

Style MCS spiral wound gaskets are available in a wide range of materials for standard, as well as special design manhole cover assemblies, in pressure classes of 0-499 psi, 0-999 psi, and 1000 psi and higher. For additional information or style MCS spiral wound gaskets, contact the Ragco location nearest you.

SELF-LOCATOR GASKETS

US NAVY "HYBRID"

The SELF LOCATOR gaskets are a complete stainless steel containment of a sealing element offering a true compression seal. The patented design gives you long term reliability without flange welding and eliminates misalignment on installation. Due to its universal sizing, one gasket fits all flange pressure classes, eliminating the chance of incorrect gasket selection. The most important feature of the gasket is the high unit load generated by the narrow sealing area provides a considerably higher flange clamping pressure and a better seal at a lower clamping force. The standard gasket material is 316 SS, with two (2) tracks of Flexible Graphite sealing elements. Specialty gasket material and/or sealing elements are available as options.

TECHNICAL DATA

SIZES	½, ¾, 1, 1¼, 1½, 2, 2½, 3, 3½, 4, 5, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24
FLANGE PRESSURE CLASS	150# to 2500#
THICKNESS	1/32" thru 12" 1/16" above 12"
TORQUE VALUES	50% to 65% of Bolt Yield
FLANGE SURFACE FINISH	10 to 400 µin RMS (microinches)
SEALING ELEMENTS WIDTH	≥1½ (gasket size) 0.125" each side ½ to 1¼ (gasket size) 0.100" each side
MIN. SEALING ELEMENT WEB WIDTH	0.670"
"M" AND "Y" VALUES	m = 2.85 Y = 2900 psi
LEAK RATE	0.005 in mg/m*s (DIN 28090 / 1.2) < 10ppm @ He
TEMPERATURE RANGE	-200°C cryogenic air +500°C in regular atmosphere +650°C in steam +1000°C reducing or inert media
PRESSURE RANGE	Full vacuum to +5000 PSI
MIN. SEATING STRESS	2900 PSI (20 MPa) 23,200 psi (160 MPa) (testing equipment limit)
RECOMMENDED SEATING STRESS	5800 to 8700 psi (40 to 60 MPa)
STANDARDS AVAILABLE	ANSI 16.5, DIN 2600, JIS B2220, BS 4505, BS 10, AUS 2129

KEY BENEFITS

- Ability to cope against severe thermal cycling and vibration
- Inherent Live Loading capability
- Fire, Blow Out and Leak proof
- Superior pressure handling
- Standardize: one gasket for all pressure classes
- Protects against use of wrong gasket
- Lowers total sealing costs
- Cannot be over compressed
- No need to re-torque
- Eliminates fugitive emissions
- US Navy approved
- ANSI, DIN, JIS, BS and AUS sizes available

TOPOG-E® GASKETS

The steam boiler market makes extreme demands on gaskets; Topog-E® molded rubber gaskets are specifically formulated to meet and exceed these demands and deliver industry standard performance.

Topog-E® Series 180 gaskets have been refined through a series of over 600 research formulation tests to ensure that they are able to meet the exacting performance standards of the steam boiler industry.

Specifically they:

1. Conform to the topography of the mating surfaces
2. Withstand a boiler's full, continuous and cycling operating pressures
3. Withstand continuous exposure to water treatment chemicals
4. Withstand continuous exposure to ion and oxygen attack in hot air
5. Prevent all leakage
6. Replace easily, without chiselling or buffing

MATERIALS

Special, proprietary rubber Composition, black, 80-85 Durometer.

SERVICE SUMMARY

Steam boilers: up to 180 psi (12 bar) and 380° F. (193° C) Water, condensate, etc. vessels: 200+ psi (14 bar) and less than 300°F. (150°C)

APPLICATIONS

When used on steam pressure vessels Topog-E® Series 180 gaskets are typically used at operating pressures of up to 180 PSI (12 bar) and saturated steam temperatures up to 380° F. (193° C) for an average service life of one year. When used in other applications (e.g. condensate, water, and air vessels) Topog-E® Series 180 gaskets are sometimes used at pressures above 200 PSI (14 bar) where temperatures are typically more moderate (e.g. below 250°F./121°C.). When operating under less severe conditions (e.g. water applications at ambient temperatures) Topog-E® Series 180 gaskets can provide very long service lives. Topog-E® Series 180 gaskets have been used successfully around the world for over forty years. In general, any type of industrial pressure vessel or tank that has inspection openings is a potential application where Topog-E® Series 180 gaskets can be used as a cost effective sealing device.

In addition to using them in steam pressure vessels, customers also use Topog-E® molded gaskets and sheet material with great success in many other applications, including:

- Water softeners
- Hot water heaters
- Steam humidifiers and cookers
- Water purifiers and demineralizers
- Refrigeration units
- Liquid treatment vessels
- Carbon absorption and filtering vessels
- Dryer cans in paper mills
- Water hydrants
- Mixing tanks
- Compressed air tanks
- Various types of dryers
- Air starters and receivers
- Deaerators
- Hatch covers
- Water towers and columns
- PVC reactor vessels

INSTALLATION ENVIRONMENT & SUITABILITY

Topog-E® Series 180 gaskets are specifically formulated to have excellent resistance to steam and hot and cold water.

They also have good resistance to:

- Alcohols
- Ketones
- Phosphate esters
- Silicone oils and greases
- Dilute acids
- Bases
- Salts
- Glycols
- Ammonia
- Selected refrigerants
- Animal and vegetable fats

Water treatment chemicals, when used in accordance with supplier's guidelines, should not have a significant effect on the service life of properly installed Topog-E® Series 180 gaskets.

Topog-E® Series 180 gaskets are not recommended for use in applications where they see direct exposure to high concentrations of aromatic hydrocarbons, chlorinated solvents, or petroleum based oils, fuels, and lubricants.

TOPOG-E® GASKET SIZES

When ordering, be sure to state the two inside dimensions (A & B), flange width (C), thickness (D), and shape (E, OB, etc.).

DISCLAIMER All information in this data sheet is based on data believed to be reliable, however we make no guarantee or warranty of performance of Topog-E® Series 180 gaskets. Because there are many application-specific factors that can affect service life it is always advisable to first test Topog-E® Series 180 gaskets in a particular application to determine their ultimate suitability.

NOTES

- Standard thickness is 1/4" unless otherwise noted under column D.
- All prices are for Topog-E® Gasket Standard Material (refer to separate Material Specification sheet for more information).
- Prices are F.O.B. Tulsa, Oklahoma 74110.
- Bracketed gaskets are not stock molded sizes, however, the first stock size can often be used on plates designed for the bracketed size.
- A 25% restocking fee may be charged on all returns.
- Special sizes and shapes can be fabricated upon request.
- Topog-E® gaskets can be made from other materials – contact us to receive a Materials Specification Sheet for Alternative Elastomeric Materials.
- We also make chemical tank and water hydrant gaskets.

DISCLAIMER Topog-E® gaskets are made and sold for use in steam, water, air, and other selected applications only. Our recommendations for their use are based on tests believed to be reliable and on actual customer experience. Since their installation and use are beyond our control, we cannot guarantee the results, whether or not such use is in accordance with instructions. We disclaim any responsibility.
